PROFESSIONAL SUMMARY

Associate AI Engineer with hands-on experience in developing AI-powered products, Generative AI applications, and backend services using Python, FastAPI, and modern LLM technologies. Skilled in designing LLM-agnostic architectures with LiteLLM, integrating OpenAI, DeepSeek, local LLMs (Ollama), RAG pipelines, AI agents, and scalable REST APIs. Experienced in AI product development, prompt engineering, backend engineering, and cross-functional collaboration to deliver production-ready AI solutions.

PROFESSIONAL EXPERIENCE

Associate AI Engineer

Feb 2026 – Present

AstroVed Pvt. Ltd. - AI-powered astrology and spiritual services platform. – Chennai, India

- Developed AI-powered applications and backend services using Python, FastAPI and REST APIs across multiple astrology and business products.
- Built LLM-powered content generation solutions for SEO blogs and personalized reports using OpenAI and modern LLM technologies.
- Designed LLM-agnostic integrations using LiteLLM, enabling support for OpenAI, DeepSeek, Gemini, Claude, and local LLMs (Ollama, Hugging Face, Groq).
- Optimized prompts and token usage to improve AI response quality, latency, and operational efficiency.
- Developed AI-driven report generation workflows by integrating internal astrology APIs with Large Language Models.
- Contributed to AI-assisted product development, including checkout redesign, homepage redesign, AI review analysis, and astrology service enhancements.
- Supported QA automation initiatives by maintaining and enhancing Playwright-based AI testing solutions used by the testing team.
- Worked with product managers, astrologers, QA engineers, and frontend developers to deliver production-ready AI features.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript.

Backend Development: FastAPI, API Integration, Django, Flask, REST APIs, JSON, Pydantic.

AI & Generative AI: LiteLLM (LLM-Agnostic), LangChain, LangGraph, OpenAI, DeepSeek, Gemini, Claude, Ollama (Local LLMs), RAG, AI Agents (Agentic AI), MCP, Prompt Engineering & Optimization, LLM Optimization, AI Architecture, Fine-tuning Concepts.

Databases & Vector Stores: MySQL, PostgreSQL, SQLite, Pinecone, ChromaDB, FAISS, Vector Embeddings.

Frontend: React (Basic), HTML5, CSS3, Bootstrap.

AI / ML Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn.

Developer Tools: Git, GitHub, Postman, Jupyter Notebook, Google Colab, Docker (Basic).

PROFESSIONAL PROJECTS

AI-Powered Numerology Prediction Platform

Technologies: Python, FastAPI, LiteLLM, OpenAI, DeepSeek, SQL, REST APIs, Prompt Engineering

- Developed an AI-powered Numerology Prediction platform using **Python** and **FastAPI**, enabling personalized report generation based on user birth details and numerology calculations.
- Designed an **LLM-agnostic architecture** using **LiteLLM** to support multiple providers, including **OpenAI**, **DeepSeek**, **Gemini**, and future LLM integrations with minimal code changes.
- Engineered dynamic prompt workflows and optimized prompt structure and token usage to improve response quality, reduce latency, and lower API consumption.
- Integrated internal astrology and location APIs with AI-generated content to produce structured, personalized numerology reports.
- Migrated the application database from **PostgreSQL** to **MySQL** to align with deployment requirements and developed scalable REST APIs for seamless frontend integration.
- Collaborated with product managers, astrologers, QA engineers, and frontend developers to refine business logic, validate AI-generated content, and deliver production-ready features.
- Managed backend deployment by publishing FastAPI services and MySQL database to the **AstroVed server**, configuring **CORS**, and delivering production-ready APIs for frontend integration.

AI-Powered Astrology Services

Technologies: Python, FastAPI, AI Agents, MCP, OpenAI, REST APIs, Prompt Engineering

- Developed Phase 1 of AstroVed's AI-powered Astrology Services by transforming existing free astrology tools into personalized AI experiences.
- Built **AI Agent**-based workflows to generate customized astrology insights using user birth details and domain-specific business logic.
- Integrated internal astrology APIs with **LLM**-generated responses to provide personalized reports instead of static content.
- Implemented an **MCP**-based workflow to deliver downloadable reports via email as part of the end-to-end user experience.
- Collaborated with product and astrology teams to define AI workflows and feature requirements for future phases.

AI-Powered SEO Content Generation

Technologies: Python, FastAPI, Streamlit, Open Source LLMs, RAG, Prompt Engineering, SEO Content Generation

- Developed an AI-powered SEO content generation system to automate blog and article creation using **Large Language Models (LLMs)**.
- Analyzed previously published AstroVed blogs and human-written articles to understand writing style, structure, tone, and SEO patterns.
- Collaborated with the **Digital Marketing team** to gather content requirements and improve AI-generated outputs for search engine optimization.
- Engineered prompt templates that generate complete **SEO**-friendly articles from simple inputs such as event name and event date.
- Reduced manual content creation effort by generating consistent, structured, and reusable content aligned with AstroVed's publishing standards.

QA Automation AI

Technologies: Python, Flask, Playwright, HTML, CSS, JS

- Took ownership of the final development phase of a **Playwright**-based QA Automation platform after receiving project handover and knowledge transfer from the previous engineer.
- Completed pending enhancements, **resolved production defects**, and deployed the application for use by the QA team.
- Investigated and fixed automation failures, server-side issues, and **deployment**-related problems to ensure stable execution.
- Provided ongoing production support by troubleshooting reported issues, deploying fixes, and maintaining the automation platform used by the testing team.

EDUCATION

SNS College of Engineering

• Bachelor of Engineering in Computer Science and Technology with **CGPA of 8.9**.

Coimbatore, India

Sep 2020 – May 2024

Little Scholars Matric Higher Secondary School

• Higher Secondary Certificate(**HSC**) - **62%**, Secondary School Leaving Certificate(**SSLC**) - **79%**

Tanjore, India

Jun 2017 – Mar 2020

CERTIFICATIONS & ACHIEVEMENTS

- Completed **Model Context Protocol (MCP)** certification from **Anthropic** for AI integration and tool interoperability.
- Completed **Claude Code Agents & Skills** certification from **Anthropic** for AI agent and workflow development.
- Obtained **Generative AI Fundamentals** Accreditation from **Databricks**.
- Completed **Data Science Master Program** from **Besant Technologies**.
- Obtained **Python for Data Science** certification from **IBM**.
- Earned **Data Visualization with Power BI** certification from **Great Learning**.
- Achieved **SQL Certification** from **HackerRank**.
- Earned **Gold Star in SQL** on **HackerRank**, showcasing expertise in database querying and optimization.
